	10	HLT	N/A	Nil	Nil	Minimum of a C in English Minimum of a C in HPE

HEAD OF DEPARTMENT: Mr Chris Lee

SUBJECT OUTLINE:

Health Education provides students with opportunities to discover and explore new concepts and ideas in the classroom in relation to health. This subject will suit students who have previously in year 8 & 9 HPE achieved at a high standard in the theoretical components. Students considering careers in the medical, social or health related fields would find this subject beneficial. The subject would also be useful to all students for the purposes of improving literacy and numeracy skills required for year 11 and 12 subjects.

Students undertaking Health and Physical Education are provided with opportunities to:
- Identify social, cultural, environmental, and political factors that influence health and attitudes towards it.
- Plan, implement and critique strategies to enhance the health, safety and wellbeing of their communities.
- Evaluate and apply health information from a range of sources to health decisions and situations.

ASSESSMENT OUTLINE:

Assessment is criteria based. The students are assessed on written tasks. They are assessed in terms of Acquiring, Applying and Evaluation and levels of achievement will range from A to E.

Written assessment may include exams, in class essays under exam conditions, assignments, reports and presentations.
